

SCHOCK Filtration Systems

Custom Engineered Filter Houses for GT Plants

Rugged stainless steel filter grid construction to ensure positive filter element seal.

Ladder & platform access to full-sized personnel door at each level

Filter grid custom designed to accept your plant's preferred filter system.

Custom instrumentation to monitor system performance.

Schock works with your plant personnel to design — from the ground up — a static (barrier) or self-cleaning (pulse) filter house system to meet your exact operational needs. Our filter house systems emphasize personnel safety, well lighted maintenance access, and easy-to-change-out filter arrangements.

Schock Filter House Features

- Barrier or Self-Cleaning designs
- Full-Sized Personnel Door at each level
- Ladder & Platform Access at each level
- 304 Stainless Steel Filter Element Grid
- Most interior hardware eliminated
- Rain or Snow hoods
- Drift Eliminator/Bird Screen
- LED Lighting & Convenient Electrical Outlets
- Epoxy Finish on Carbon Steel (Interior & Exterior)

Installation Features

- Shipped by module — with maximum assembly already completed
- Can utilize existing structure or position to maximize flow distribution
- Most systems can be installed in a week or less
- Minimal crane time: on site only for a few lifts

SCHOCK Filtration Systems

Custom Engineered Filter Houses for GT Plants

Filter House Services

- Free on-site inspection of existing filter system, including a comprehensive report
- Coordination with your plant personnel and engineers to develop the best solution for your specific needs
- Development of the most economical, turn-key solution
